“ I wanted to... let you... know how nice it is to have a group of workers show up on site that **come prepared and work quickly and safely**. We have been **nothing but impressed** with their attitudes, work ethic, and commitment to safety. From forklift spotters to fall protection/PPE and every other aspect of this project, **we haven't had a single issue**. We greatly **appreciate their dedication** to getting the work done on time and safely! **We will not hesitate to reach out for future projects**. Job well done!

WE PROTECT YOUR PEOPLE

INSPECTION & TESTING SERVICES

KNOW YOUR SYSTEM IS READY

EDGE Fall Protection provides comprehensive inspections, anchor pull testing, and detailed documentation to support applicable OSHA and ANSI requirements so you clearly understand your system's condition before an audit, insurance review, or incident.

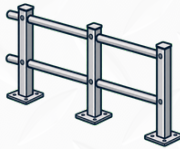

WE INSPECT & TEST

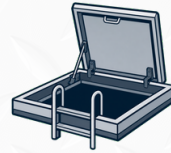

ANCHOR POINTS

LIFELINE SYSTEMS

GUARDRAILS

FALL PROTECTION EQUIPMENT

WHY EDGE FALL PROTECTION?

- ✓ Experienced technicians trained in applicable OSHA, ANSI, and manufacturer requirements
- ✓ Full-scope evaluations covering anchors, lifelines, guardrails, hatches, and PPE
- ✓ Certified anchor pull testing that verifies real load-bearing strength, not just a visual check
- ✓ Complete documentation: photos, measurements, test results, and certification ready for any audit
- ✓ Clear corrective-action plans your team can actually act on

INSPECT

RECOMMEND

INSPECTION GUIDANCE:

- Personal fall protection systems must be inspected before initial use and at the start of each work shift.
- Periodic inspections and testing should follow applicable OSHA and ANSI requirements and manufacturer instructions.
- Systems should also be inspected after a fall, impact, or event that may affect their integrity.

DON'T ASSUME IT'S SAFE. HAVE IT INSPECTED.

Schedule your inspection or anchor pull test today.
